The Garden Club of Wilmington was founded in 1918 by a group of women who were active horticulturalists. They were interested in gaining knowledge of and skill in gardening through study, experimentation, demonstration, and competition within the Club. In 1920, the Club was admitted to membership in the Garden Club of America, whose purpose is to stimulate the knowledge and love of gardening, to share the advantages of association by means of educational meetings, conferences, correspondence, and publications, and to restore, improve, and protect the quality of the environment through educational programs and action in the fields of conservation and civic improvement.
